PROGRAM DESCRIPTION

The goal of the program is to cultivate life-long learners and innovative healthcare professionals who will provide comprehensive nursing care across all levels of the health system. Graduates will be equipped to deliver ethical, culturally competent, and evidence-based nursing services; engage in critical inquiry and research; assume leadership roles in nursing education and administration; and actively contribute to global health initiatives. The program emphasizes the development of critical thinking skills, social responsibility, and a commitment to continuous professional growth, preparing graduates to adapt to evolving healthcare challenges and make meaningful contributions to their communities and the nursing profession worldwide.

LEARNING OUTCOMES

Upon successful completion of the program, the students will be able to:

1. Integrate knowledge, behavioral skills, and a compassionate attitude in delivering patient-centered nursing care across diverse healthcare settings.
2. Participate in decision making on health service delivery in varied global settings based on comprehensive health assessment.
3. Provide ethical and evidence-based nursing care to individuals, families, and communities.
4. Manage promotive, preventive, curative and rehabilitative health services in varied global settings
5. Design and implement nursing training curricula within an acceptable professional, legal, and ethical framework.
